(54) Title: DISPLAY PACKAGE FOR GLOVES IN COMPRESSED STATE

(57) Abstract: Display packaging comprising a support or backing member (5) upon which at least one item can be located; at least one compression member (6, 8) movably connected or attached to the support member, said compression member being moveable to a position to compress the item located on the support member; and a cover member (30) such as a sleeve, bag, envelope or shrink wrap film is capable of being located around the compression member and item when located on the support member. The package is a blank made from cardboard and has holdings tabs (7, 11) that engage with slots (20, 22). Compressing the item inside the package removes trapped air thereby reducing the size of the item and/or package. The package can be used for gloves (50) or socks in which the items are compressed to occupy a smaller space or volume as compared to a rest or unrestrained size of the items.
